- Research Committee– Directing OTIS Research Projects and reviewing proposals and manuscripts
- Website Committee – Maintaining content of the website, reviewing and approving all new website updates or additions before submission to the webmaster

Scholarship Information

Kay Padgett Scholarship: Offering scholarships to assist OTIS members in attending educational meetings.

Kay Padgett was the administrator of the Reproductive Toxicology Center since it was first conceived in the early 1980s. She was instrumental in getting REPROTOX off the ground and in keeping it running.

Kay was a familiar voice on the phone to many OTIS members. She helped with connection problems, payment questions, and most other issues. She was a librarian by training and established search algorithms for REPROTOX that were subsequently adopted by the National Library of Medicine. It was typical of Kay to keep working even after being challenged by the disease that ultimately took her life. When it was clear to her that she would not survive, she helped us design automated systems that would replace her. Although, of course, nothing could really replace her. Because Kay was so devoted to the Teratology Information community, we could think of no better memorial than a scholarship to assist OTIS members in attending educational meetings.

Susan Briggs Scholarship: The Susan Briggs Memorial Scholarship Fund is dedicated to the memory of Susan Briggs who passed away on June 28, 2009. Her husband, Jerry, has been Chair of the OTIS Research Committee for many years. According to Jerry, Susan always supported and encouraged his involvement in OTIS. Following her death, the Susan Briggs Memorial Scholarship Fund was established by the OTIS Board of Directors to encourage OTIS members who are not already Research Coordinators to attend the OTIS Midyear Research Meeting to learn more about OTIS research activities.
